DIRECTORS' REPORT

FOR THE FINANCIAL YEAR ENDED ON 30 JUNE, 2022

Dear Shareholders,

In terms of provisions of section 184 of the Companies Act 1994, (Act no. XVIII of 1994), it is the pleasure of Board of Directors to submit its Report to the Shareholders for the Year Ended on 30 June, 2022 in the following paragraph

(i) Industry outlook

Metro Spinning Limited is one of the pioneers in the spinning industry in Bangladesh which was established in 9th May 1993. It is a Public Limited Company, listed with Dhaka Stock Exchange and Chittagong Stock Exchange in the year of March 14, 2002. It has a capacity of 34,872 spindles with state of art machinery, imported from Japan, China, India, Italy, USA, Germany and Taiwan. The company is producing quality yarn for the both export and local market with an annual production capacity of 4.50 million kg. Metro usually produces 20/1 to 80/1 count of 100 % Cotton Yarn, Grey Mélange Yarn and 100% white viscose. Metro is successfully created excellent name and fame for itself both in local and export market for its product and services provided to the customer from its inception till to date.

Spinning sub-sector remains crucial to RMG value chain helping to stabilize supply chain, while controlling costs. The products of the spinning sub-sector are cotton yarn, polyester, synthetic yarn, woolen yarn and blended yarn mixed of cotton and polyester of different counts (mostly up to 80 count). Yarns are being used by the weaving sub-sectors like specialized textiles, handlooms and knitting and hosiery. The growth in the export of clothing with the phasing out of MFA in 2005 has led to the setting up of 350 spinning mills and there has been a boost in investment since 2001. The private sector spinning mills can now meet around 100% demand of yarn at the domestic level as well as 95% of the demand for yarn for export oriented knit fabrics mills. In addition, almost 85% of cotton yarns and 50% demand for synthetic and blended yarn of export-oriented fabric producing mills are being met by the private sector spinning mills.

(ii) The segment wise or product wise performance:

Particular	Unit	Year	
		2021- 2022	2020- 2021
Spindle	Number	34,872	34,872
Production Capacity (Yarn)	KG	4500 M.Ton	4500 M.Ton
Actual Production (Yarn)	KG	2526 M.Ton	3465 M. Ton
Capacity Utilization	%	56.13%	77%

(iii) Risk and Concern

Risks and concerns including internal and external risk factors, threat to sustainability and negative impact on environment

1. Industry Risk

Textile is the largest industrial sub-sector in Bangladesh. It contributes highest in the country's total export earnings, gives employment to over four million people meets the second basic need for clothing of the country and contributes

around 50% of the industrial value addition. But after phasing out of the, Multi Fiber Agreement (MFA) the global textile trade is now free from quota restriction.

Management Perception

The textile industry has successfully coped with the post Multi Fiber Agreement (MFA) competitive situation. The force, which is helping the sector for its strong existence is emergence of backward linkage industries. Backward linkage industries are supporting for minimizing lead- time and cost of production. The company is a first state of backward linkage industry of yarn production that facilitates for better existence.

2. Interest Rate Risks

Interest/Financial charges are paid against any kind of borrowed fund. Volatility in money and increased demand for loan presses on interest rate structure to be fixed in high. Raising of interest rate increases the cost of fund for a company, which have borrowed fund, and consequently profit is squeezed.

Management Perception

The management of the Company is always aware of interest rate, which is concerned to the cost of fund of the company. The Management prefers in procuring of the long- term fund with minimum fixed interest rate and the short term fund with reasonable competitive rate. On the other hand, management of the company is emphasizing on equity based financing.

3. Exchange Rate Risk

The Company is export oriented. The products of the company are sold against foreign currency and payments for raw material are also made in foreign currency. If exchange rate is increased against local currency opportunity is created for getting more revenue against sale in local currency. On the other hand, if exchange rate goes down margin is squeezed in local currency.

Management Perception

The exchange rate of the country is traditionally witnessed of upward trends, which markets ample opportunity of export. On the other hand, management perceives revaluation of local currency i.e. down trend of exchange rate will have little impact on profitability of the company.

4. Market and Technology related Risk

Among the functional areas in a yarn company, marketing exerts the sheet part of the importance. Proper implementation of the marketing tools as well as identifying new client will ensure the success of the project. The continuous changes on performance in the garment and textile market will force company to catch the trend. For which the company has to produce yarn for international demand.

Management Perception

The company set its focus only in countries export Market through inland back-to-back letter of credits. The management is trying to sell through direct contact with the customers (RMG & Knitting Industries) in the selected regions understanding their needs. The company also has established relationship with potential buyers across the country and expects to find market for its capacity despite competition prevailing in the sector. Further the commercial bank and financial institutions provide a thrust in the textile sector as they provide credit facilities to RMG & knitting industries to acquire the yarn for their final products.

5. Changes in Economic & Political Condition

Changing economic conditions may affect the demand for the product offered by the company. Downturn of economic activity or uncertainty may result in a downturn in demand for loan funds for industry.

Management Perception

Social unrest due to political reasons may cause downturn the economic activity which will have impact on demands of textile. But as elected Government is in place, we can expect that political rivalry within democratic environment will not affect the manufacture sector.

6. Energy costs may rise

Due to the adverse power situation in the country especially insufficient availability natural gas, the utility cost increased. Continuous hike in power generating energy cost we are using captive gas line from Titas and producing own energy to run the factory by using world class gas generator. In this process tariff of gas, lube oil, spare parts cost and maintenance cost increased remarkably, causing increase in cost of goods sold and reducing profitability.

The Company itself sufficient in generating power by its own generators. However, in case of gas shortfall and subsequent rationing if any, then the productivity will be reduced. In that scenario, the overall sector will be affected.

7. Operational risks

Shortage of power supply, labor unrest, unavailability or price increase of raw material, natural calamities like flood, cyclone, earth quack etc. may disrupt the production of the Company and can adversely impact the profitability of the Company.

Management Perception

The compensation as well the benefit package will restrain the employees to leave their assignment and got for any employee movement for higher benefit packages. The project of the company is situated at a high land where less record of flood. The factory building has strong RCC foundation, RCC floor, pre-fabricated steel structure to withstand wind, storm rain etc. along with good drainage facility. The risks from these factors are also covered through insurance. The Company is also facilitated to keep a rational reserve for any future price escalation of the raw material.

(iv) COGS, Gross/ Net Profit Margin Analysis

A discussion on Cost of Goods Sold, Gross Profit Margin and Net Profit Margin is as follows;

Particular	Year		Deviation (Increase/Decrease)
	2021-2022	2020-2021	
Cost of Goods sold	77,10,60,837	835,138,380	(6,40,77,543)
Gross Profit Margin	20.41%	16.08%	4.33%
Net profit Margin	8.78%	7.06%	1.72%

Cost of Goods Sold decreased due to less consumption of Raw Materials for less production, Gross Profit Margin increased due to decreased of Cost of Goods Sold and Net Profit Margin increased due to increase of Sales price, decrease of Cost of Goods sold and also decrease of Interest and Financial Charges.

(v) Extra-ordinary activities

There were no extraordinary activities during the year.

(vi) Related party transactions

The following statement showing the related party transactions as per IAS-24 along with amount, nature of related party, nature of transactions and basis of transactions:

Particular	Nature of Relationship	Outstanding Balance as on 30 June, 2022
Maksons Spinning Mills ltd.	Common Director	6,264,037
